
Correction

In the article “Exploratory Analyses of Efficacy Data From Major Depressive Disorder Trials Submitted to the US Food and Drug Administration in Support of New Drug Applications” by Ni A. Khin, MD, and colleagues published in the April 2011 issue (*J Clin Psychiatry* 2011;72[4]:464–472), the legend for Figures 1, 2A, and 3 has been corrected online to “△ Trial with mean baseline HDRS score < 20” and “■ Trial with mean baseline HDRS score ≥ 20”; and the legend for Figure 2B has been corrected to “■ Trial with mean baseline HDRS score ≥ 20.” The staff regret the errors.
