

THE JOURNAL OF  
**CLINICAL PSYCHIATRY**

THE OFFICIAL JOURNAL OF THE AMERICAN SOCIETY OF CLINICAL PSYCHOPHARMACOLOGY

## **Supplementary Material**

**Article Title:** Antipsychotic Treatment and the Risk of Hip Fracture in Subjects With Schizophrenia: A 10-Year Population-Based Case-Control Study

**Authors:** Chi-Shin Wu, MD, MS; Chia-Ming Chang, MD, PhD; Yu-Ting Tsai, MS; Ya-Wen Huang, MS; and Hui-Ju Tsai, MPH, PhD

**DOI Number:** 10.4088/JCP.14m09098

### **List of Supplementary Material for the article**

1. [eTable 1](#) Receptor binding affinity ( $pK_i$ ) for antipsychotic drugs
2. [eTable 2](#) Demographic and clinical characteristics of the FGAs, SGAs and combination drug users
3. [eTable 3](#) Association of the use of each antipsychotic drug with risk of hip fracture

### **Disclaimer**

This Supplementary Material has been provided by the author(s) as an enhancement to the published article. It has been approved by peer review; however, it has undergone neither editing nor formatting by in-house editorial staff. The material is presented in the manner supplied by the author.

Supplementary eTable 1. Receptor binding affinity (pK<sub>i</sub>)\* for antipsychotic drugs

Drug name	5HT <sub>2A</sub>	D <sub>2</sub>	α <sub>1</sub>	H <sub>1</sub>
First-generation antipsychotics				
Chlorpromazine	7.96	8.29	8.59	8.51
Clothiapine	8.46	-	-	-
Flupentixol	7.06	8.82	-	9.07
Fluphenazine	7.42	9.27	8.20	7.85
Haloperidol	6.81	8.92	7.77	5.77
Perphenazine	8.25	9.04	8.00	8.10
Thioridazine	7.56	7.98	8.30	7.78
Trifluoperazine	7.13	8.89	7.62	7.20
Second-generation antipsychotics				
Amisulpride	5.08	8.89	5.00	5.00
Clozapine	7.80	7.27	8.17	8.95
Olanzapine	8.62	7.28	7.36	8.66
Quetiapine	6.04	6.39	8.09	8.16
Risperidone	9.23	8.24	8.57	7.70
Sulpiride	5.00	7.84	5.00	5.00
Zotepine	8.57	7.60	8.14	8.49

Note:

Abbreviations: 5HT<sub>2A</sub>=serotonin 5-HT<sub>2A</sub> receptor; D<sub>2</sub>=dopamine D<sub>2</sub> receptor; α<sub>1</sub> adrenergic receptor; H<sub>1</sub>=H<sub>1</sub> histaminergic receptor.

\* A minimal (pK<sub>i</sub>) value of 5.0 was used for low binding affinity.

Supplementary eTable 2. Demographic and clinical characteristics of the FGAs, SGAs and combination drug users.

	FGAs		SGAs		combination		<i>P-value</i> <sup>a</sup>
	(n=375)		(n=1,415)		(n=436)		
	n	%	n	%	n	%	
<b>Age (mean ± SD)</b>	55.22±15.55		58.38±16.75		52.28±15.90		NP <sup>b</sup>

Note:

<sup>#</sup> Model 1: crude analysis; Model 2: adjusted analysis including all covariates listed in Table 1; Model 3: adjusted analysis including the covariates listed in Table 1 and  $p < 0.15$  after stepwise selection (anemia, hypertension, cerebrovascular disease, chronic pulmonary disease, Parkinson's disease, renal failure, sleep disorder, alcohol-related disorder, dementia, antidepressants, anticonvulsants, anxiolytics, benzodiazepines, hormone replacement therapy, ambulatory visits and inpatient visits).

\* Antipsychotic use is defined as at least one day of antipsychotic drug supply within the 6 months prior to the index date.

<sup>a</sup> Significant results ( $p < 0.05$ ) are in bold.

<sup>b</sup> Subjects without antipsychotic use were used as the reference group.
