

# THE JOURNAL OF CLINICAL PSYCHIATRY

THE OFFICIAL JOURNAL OF THE AMERICAN SOCIETY OF CLINICAL PSYCHOPHARMACOLOGY

## Supplementary Material

**Article Title:** Clinical Dimensions Associated With Psychological Pain in Suicidal Patients: One-Year Follow-up Study

**Author(s):** Adrián Alacreu-Crespo, PhD; Sébastien Guillaume, MD, PhD; Stéphane Richard-Devantoy, MD, PhD; Aurélie Cazals, MS; Emilie Olié, MD, PhD; and Philippe Courteau, MD, PhD

**DOI Number:** 10.4088/JCP.21m14065

### List of Supplementary Material for the article

1. [Table 1](#) Unadjusted Logistic Regression Analysis of Suicidal Ideation Using Current and Worse Psychological Pain as Predictors of Suicide
2. [Table 2](#) Variables Explaining High Psychological Pain
3. [Table 3](#) Description of the Baseline Sociodemographic and Clinical Variables of Patients With and Without Follow-up Data
4. [Figure 1](#) Mean  $\pm$  SE of Psychological Pain, Physical Pain and Depression Across the Follow-up

### Disclaimer

This Supplementary Material has been provided by the author(s) as an enhancement to the published article. It has been approved by peer review; however, it has undergone neither editing nor formatting by in-house editorial staff. The material is presented in the manner supplied by the author.

**Supplementary table 1: Unadjusted logistic regression analysis of suicidal ideation using current and worse psychological pain as predictors of suicide:**

Current psychological pain			Worse psychological pain		
	$R^2_{cs} = .04, R^2_N = .04, \Delta\chi^2 = 14.49^{***}$	B (SE) p-value OR [95% CI]		$R^2_{cs} = .09, R^2_N = .11, \Delta\chi^2 = 38.40^{***}$	B (SE) p-value OR [95% CI]
SA-P (1) vs AC (0)	.19 (.05)	.001 1.21 [1.09 - 1.34]	SA-P (1) vs AC (0)	.21 (.06)	.001 1.23 [1.11 - 1.37]
SA-R (2) vs AC (0)	.14 (.05)	.003 1.15 [1.05 - 1.26]	SA-R (2) vs AC (0)	.30 (.05)	.001 1.35 [1.22 - 1.49]
SA-R (2) vs SA-P (1)	-.05 (.05)	.256 .95 [.87 - 1.04]	SA-R (2) vs SA-P (1)	.09 (.06)	.118 1.09 [.98 - 1.23]

Note: \*\*\*  $p < .001$ ;  $R^2_{cs} = R^2$  Cox & Snell;  $R^2_N = R^2$  Nagelkerke;  $\Delta\chi^2$  = Change in chi-square; AC = Affective controls; SA-P = Past suicide attempters; SA-R = Recent suicide attempters.

**Supplementary table 2: Variables explaining high psychological pain:**

	High pain	Low pain	p-values	Ad. p-values, OR [CI95%]
N =	207	164		
<b>Sociodemographic</b>				
Age	39.81 ± .84	44.78 ± .99	<b>p &lt; .001</b>	<b>p &lt; .003, .97 [.96 - .99]</b>
Education years	13.53 ± .18	13.43 ± .23	<i>p &lt; .411</i>	<i>p &lt; .313, 1.04 [.96 - 1.13]</i>
